Fit2Walk/Medical Monofilament Manufacturing
121-2 Camelot Drive
Plymouth, MA 02360

To Whom It May Concern,

I would like to take this opportunity to thank you for your generous donation of Monofilaments.

We are a not for profit Community Diabetes Education Outreach Program who provides diabetes education to uninsured/underinsured communities in three rural counties in Oklahoma. Due to low literacy and little or no access to health care, this population often suffer the extreme complications that follow unmanaged diabetes.

With your generous donation of monofilaments we were able to put together a foot care packet. This packet contained information about the importance of foot care, how to care for feet, a mirror, a monofilament, and an emery board. Each member of our first class received one of these packets.

Your monofilaments allow diabetics to have more control over the management of their diabetes and thus help minimize the serious foot complications that can result from chronic high blood sugar.

Thank you again for your donation, I know it will make a huge difference to the people who received them.

Sincerely,

Michelle Bero, RN, BSN
Diabetes Educator
